

OUR ENERGY POLICY

Bidco Africa is committed to conform to all the requirements of standard ISO 50001, energy management system by improving energy efficiency, utilization and conservation of energy.

We are committed at all levels to:

- ◆ Periodically review and implement a strategic plan for energy efficiency and conservation.
- ◆ Train staff to ensure competence in energy management.
- ◆ Comply with applicable legal and other regulatory bodies to which the organization subscribes, relating to energy utilization.
- ◆ Explore energy efficient products, technology, service and design for improved energy performance based on set standards.

OUR GOALS

- ✓ Bidco aims to reduce the environmental impact related to energy consumption through taking energy conservation measures, while exploring the use of renewable energy.
- ✓ Bidco shall regularly conduct internal & external energy audits to identify areas of improvement and compliance.
- ✓ The management will ensure availability of necessary resources to achieve set energy objectives and targets.
- ✓ Bidco shall promote awareness to all stakeholders through communication of our energy performance.
- ✓ Bidco is committed to procurement of energy-efficient products, services and designs for energy performance improvement.
- ✓ Bidco shall regularly review & update the company energy policy as and when required to conform to best practices.
